

UTPAL SONOWAL

Full Stack Developer (Next.js, React, Node.js, PostgreSQL)

+91 9864341272 | sonowalu73@gmail.com | [in](https://www.linkedin.com/in/utpx.in) LinkedIn | utpx.in

Technical Skills

Languages: C/C++, JavaScript, TypeScript, PHP, SQL, HTML5, CSS3,

Frontend: React, Next.js, Tailwind CSS, Bootstrap, Shadcn UI, React Router, Redux Toolkit, Context API, Axios

Backend: Node.js, Express.js, REST APIs, API Versioning, JWT Authentication, Authentication & Authorization, Zod

Databases: PostgreSQL, MongoDB, Prisma ORM, Redis

DevOps: Docker, CI/CD, Vercel, Render

Tools: Git, GitHub, Postman, Figma, VS Code

Experience

Full Stack Developer Intern

Mar 2025 – Jul 2025

National Informatics Centre (NIC) — India

- Developed a role-based **Warehouse Management System** using **PHP, PostgreSQL, JavaScript, Bootstrap, and Chart.js**.
- Designed and integrated **PostgreSQL database schemas** and backend APIs to manage warehouses, wholesalers, retailers, and commodity records.
- Implemented **authentication, CRUD operations, and warehouse-to-distributor mapping** to streamline food distribution workflows.
- Build responsive dashboards and automated **Excel Report Generation** to improve operational visibility and reporting efficiency.

Projects

Snip — URL Shortener | Frontend Backend | React, Node.js, Express, PostgreSQL, Redis

- Developed a full-stack URL shortener with custom aliases, QR code generation, and real-time analytics.
- Engineered a production-grade authentication system with JWT access/refresh token rotation, Google OAuth, Redis-backed OTP verification, BullMQ-powered email queuing, and rate limiting.
- Optimized URL redirection, achieving average response times below 50 ms through efficient database queries and backend optimization.
- Built a scalable analytics pipeline to capture and aggregate click metadata, including location, device, browser, operating system, and referrer.

Two Tier Transportation Management System | PHP, Laravel, PostgreSQL, JavaScript, Bootstrap

- Developed a role-based Warehouse Management System to manage warehouses, wholesalers, retailers, and commodity distribution across districts.
- Designed a normalized PostgreSQL database and implemented CRUD operations with secure authentication and role-based access control.
- Automated transportation bill calculations based on commodity, distance, and geographical area, reducing manual calculation errors.
- Optimized backend workflows for warehouse-to-distributor mapping and monthly transportation report generation.

Education

Bachelor of Computer Applications (BCA)

2023 – 2026

North Lakhimpur University

CGPA: 7.8 / 10
